

In the Claims

Claims 1 – 8 (Cancelled)

9. (New) A fiber yarn which is a yarn containing a filament of cellulose-based fiber made from a bamboo having a thickness of about 10 to about 600 dtex and number of twist of 0 to about 3,000 T/M.

10. (New) The fiber yarn according to claim 9, wherein an amount of α -cellulose component of said filament is about 80 wt% or more.

11. (New) The fiber yarn according to claim 9, wherein a total amount of α - and β -cellulose component in said filament is about 90 wt% or more.

12. (New) The fiber yarn according to claim 9, wherein the filament is produced by a continuous spinning system of viscose rayon process.

13. (New) The fiber yarn according to claim 9, wherein the fiber yarn contains at least about 20 wt% of said filament and another fiber that is at least one fiber selected from the group consisting of natural fiber, regenerated fiber, semi-synthetic fiber and synthetic fiber.

14. (New) The fiber yarn according to claim 9, wherein raw material of the cellulose-based fiber is a biomass resource.

15. (New) The fiber yarn according to claim 13, wherein the filament and the another fiber are made into a composite by any one method selected from the group consisting of doubling and twisting, intersection twisting, covering, filament mixing, false twisting and spinning intersection twist.

16. (New) A cloth comprising a woven or knitted fabric or a non-woven fabric comprising the fiber yarn according to claim 9.
